

An-Chi Liu

SENIOR SOFTWARE ENGINEER · AI PLATFORMS, RAG & CLOUD-NATIVE INFRASTRUCTURE

Taiwanese, based in Tokyo, Japan (Permanent Resident)

✉ phy.tiger@gmail.com | 🏠 tigercosmos.xyz | 📱 tigercosmos | 🌐 liuanchi

Summary

Starts platforms from zero and gets them adopted: delivered T2's company-wide **evaluation and QA platform**, a 12-engineer-month plan, in 6 months on hybrid on-premises **GPU** and cloud **Kubernetes**; co-founded an **LLM/RAG** product. Hands-on in **Go, Python, C++**: second-largest contributor to a C++ numerical toolkit (255 merged PRs), core maintainer of a 3.1k-star networking library. **AI-driven workflow**: architecture by hand, implementation by coding agents, human review plus CI and sanitizers gating every merge.

Work Experience

T2, Inc. (L4 Autonomous Trucking)

Senior Software Engineer

- **Conceived, proposed, and delivered** a company-wide **evaluation and QA platform** from zero: design, budget, adoption. Shipped a 12-engineer-month plan in **6 months** over **7 major releases**; **3,000+ simulation jobs** to date.
- Chose **hybrid Kubernetes** over pure cloud: on-premises **GPU** nodes for steady load, cloud workers for bursts, cutting per-run cost and keeping proprietary data on site. **Go** backend, **React** frontend, automated **Docker** delivery.
- Built a **validation framework** scoring millions of runs against explicit metrics, wired into **CI** for every change. Replaced thousands of engineer-hours of manual review; evidence base for T2's **safety certification**.

Tokyo, Japan
Nov. 2025 – Present

Datra AI

Technical Co-founder

- Co-founded an **LLM** product for **Shopify** merchants. Owned architecture (**Go, React, PostgreSQL, AWS**) and managed two developers.
- Designed the **RAG** pipeline: merchant data embedded into **pgvector**, retrieval-grounded prompting, and a labeled test set to measure answer quality and catch hallucinations before release.
- Evaluated **OpenAI** and **Claude** models per task on cost, latency, and quality; routed each workflow to the cheapest model meeting its bar, providers kept swappable.

Remote
Feb. 2025 – Sep. 2025

Mujin, Inc.

Backend Software Engineer

- Built live streaming and playback for **100+ cameras** under **50 ms** end-to-end latency with **WebRTC, FFmpeg**, and **Go**, chosen after benchmarking RTSP and HLS.
- Developed a **C++ network discovery service** (PcapPlusPlus) locating **Ethernet/IP** robots and cameras within seconds; extended C++/Python robot control systems.

Tokyo, Japan
Sep. 2022 – May 2025

Education

National Yang Ming Chiao Tung University (NYCU)

M.S. in Computer Science and Engineering

- GPA: 4.11/4.3. Thesis: **Offworker: An Offloading Framework for Parallel Web Applications**, published in **WISE 2022** (top-tier conference).
- **Best Master's Thesis Award**, Institute of Information & Computing Machinery, Taiwan (2022; one of 13 awardees).

Hsinchu, Taiwan
Sep. 2019 – May. 2022

National Taiwan University (NTU)

B.S. in Bio-Industrial Mechatronics Engineering

Taipei, Taiwan
Sep. 2014 – Jun. 2019

Open-Source Projects

PcapPlusPlus

- **One of five core maintainers** since 2024 for a 3.1k-star, multi-platform **C++** packet-processing library: performance, CI/CD, protocol support.

solvcon

- **Second-largest contributor** (255 merged PRs, 67k lines) to a **C++/Python** numerical toolkit: SIMD array kernels, time-series and MCAP/ROS 2 ingestion, and the Pilot GUI. [PRs]
- Built the **AI agent** subsystem: one interface over Claude, Codex, and OpenAI-compatible backends, sandboxed bounded-loop execution, and tool calling that drives the GUI. Presented at **PyCon JP 2024**.
- Wrote the project's **agent governance**: coding style guides for agents, PR protocol skills, sandbox pinning, and three-platform CI with sanitizers and clang-tidy gating every merge.

Skills

Programming	Proficient: Python 3, C++11/14/17, Go; Experience: TypeScript, JavaScript, Bash
AI / LLM	LLM application architecture, RAG, pgvector, prompt engineering, model evaluation, OpenAI/Anthropic APIs, coding agents
Cloud / Network	Kubernetes (hybrid on-prem GPU + cloud), Docker, AWS, Linux, CI/CD, PostgreSQL, Ethernet/IP, PcapPlusPlus, ZMQ, WebRTC, Git
Evaluation/Data	Evaluation pipelines, metrics and dashboards, regression testing, time-series processing, MCAP, ROS 2, pybind11
Languages	Mandarin Chinese (Native), English (Business), Japanese (Limited Conversational)
